I've Got Your Number!

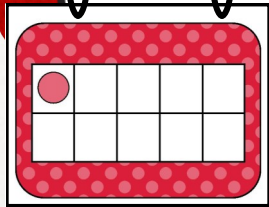

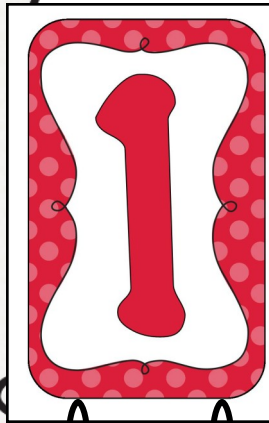

Build A Number:

1. Run these numbers and ten grids off using cardstock. Laminate them.
2. These should be hung up in your classroom where they can be referred to. The mats can be attached to the bottom of each card with rings.
3. I would suggest making an additional set for students to use when released to independent math stations for number sense work.

A Friendly Reminder:

These number cards are a freebie and are not intended for sale. The digital backgrounds are by Dreamlike Magic and can be found on www.etsy.com/shop/dreamlikemagic. Please remember this is for individual classroom use only. Please do not use them in any other manner without consulting me.

If you are interested in my other products they can be found on TpT under Fran Kramer. If you download this item be kind enough to follow my shop and leave a comment that will make me smile! Enjoy your numbers. Fran Kramer
