## - About this Resource

This is an addition and graphing activity that is ideal for independent practice or as a partner activity at a math workstation.
For independent practice, have students complete the activity on their own and see which row on the graph will be filled in first. As a partner activity, you may choose to have students see who can get one row filled up first. Alternatively, students can work cooperatively to try to fill the rows.
I have included two versions of this activity which will help you provide differentiation within your classroom. The first page involves adding two dice (addends) to make a sum. The second page involves adding three dice (addends) to make a sum. Use the three-addend version as enrichment for some students, or as a follow-up to the two-addend version.

> Enjoy!

Have students write the addends in each box on the graph as they roll the sums.

Roll $a$ dice. Add them together to make a sum. Find the sum on the graph and write the addends in one square. Then roll again. Which row will you fill in first?

| 2 |  |  |  |  |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3 |  |  |  |  |  |  |  |  |
