Thank you for your interest in my math center games. My students enjoy the variety I have for them in math centers.

This game is designed for students to roll 2 or 3 dice, add the numbers, and find the answer on the beach balls. Each game board has the number of dice to roll and can be laminated or put into a page protector. You can use counters or poker chips to cover the beach balls.

If you have any questions about this game, you can email me at mychlojo1@gmail.com

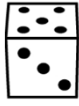

Follow my store and receive updates on new and free products.
