Addition and Subtraction
board game

By Deedee Wills
Clip art by Scrapping Doodles
www.mrswillskindergarten.com

Copy the game board on card stock, trim, and glue to a piece of oversized construction paper (your art teacher may have a piece to spare). Then laminate. Also copy and laminate the game pieces and equation cards.

Red Framed Cards:

Addition and Subtraction equations 0 - 5

Blue Framed Cards

Addition and Subtraction equations 6 - 10

You can use the game pieces below or I like to use games pieces from old "Sorry" games...Time to hit the garage sales!

To Play: Students draw cards. Then build the equation with counters. After they build the equation correctly, they may move their game piece that many spaces.

I hope you enjoy your FREEBIE! Please consider rating my product. If you are not 100% happy, please email me so I can make it better.

Sincerely,
Deedee Wills

Check out my blog for other ideas and FREEBIES!!!
www.mrswillskindergarten.com

Note: I like to keep the cards in empty frosting containers. Students draw the cards out of the container versus trying to keep them in a stack. It is easier for smaller hands.
